Falls

What Happened:

An employee fell on torn carpet while entering building 4201. The employee's shoe caught on the torn carpet causing her to fall, almost hitting the double glass doors. There were no broken bones, but she pulled the muscles in her foot. The injury could have been more serious.

The Accident Was Caused By:

An unsafe condition due to loose and uneven carpet was the cause of this mishap. Apparently the carpet was torn loose by moving heavy objects through the doorway over a period of time.

What you can do:

Unsafe conditions are responsible for falls in the workplace. Take time to report all unsafe conditions or correct them immediately.

- Watch your step
- Walk, don't run
- Keep your vision clear
